

Re.: REACH

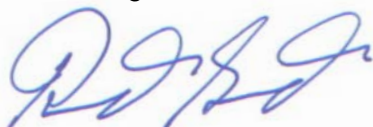

Dear Sir / Madam,

We are only downstream users and are not included, according to our opinion, of the same obligations against REACH as our suppliers of chemical products are. Furthermore our product line of cables and flexible cords consists mostly of copper and polymers (plastic) where polymers are excluded from registrations according to article 2.9 in the REACH regulations.

Of that very reason we refrain from certifying or declaring different types of questionnaire as to whether if our suppliers of chemical products take care of their obligations to REACH. We have furthermore been in contact with the Swedish Chemicals Agency information, where they had affirmed our reasoning.

Do not hesitate to contact the undersigned if you have any questions or queries regarding our standpoint.

Best regards

Roland Sköld
