Gorizia, March 25, 2013

Attention to: *Mr. Tore Haug*

Subject: REACH Directive Compliance

With reference to your request of information about REACH regulations, related to our products, we would like to inform you about the position of Coveme S.p.A.

REACH concerns hazardous and non hazardous chemical substances, which, for example, are present in our product.

Our products are considered "articles" under REACH terminology (Art.3.3) but they don't need registration because they do not fall into Art.7.1.(Substances incorporated in articles are subject to registration if they are present in the articles in quantities over 1 ton per year and if they are intended to be released during normal or foreseeable condition of use).

In our products there are not any substances that intentionally release from the surface of the film.

Furthermore we declare that our products don't contain any substance listed in the SVHC lists (updated on 19<sup>th</sup> December 2012).

Coveme S.p.A. uses chemical substances consequently we depends on REACH registration of these chemical products. Since 2007 we are monitoring our chemical supplier to get the permanence of our supply chain.

Materials involved:

- o PET

If you need further explanations please send your questions to me ([ecressi@coveme.com](mailto:ecressi@coveme.com)).

Best regards

  
Enzo Cressi  
Quality Manager
