## SEMIKRON position on RoHS regulation

Dear Ladies and Gentlemen,

SEMIKRON is committed to providing our valued customers with environmental friendly products that are compliant with the European Union RoHS in Electrical and Electronic Equipment (EEE). Therefore SEMIKRON strives to avoid using regulation named critical substances and not to exceed the threshold levels as specified by the regulation (Restriction of Hazardous Substances). We are closely following any modification of the RoHS Directive as well as of the candidate list and follow up Directives.

SEMIKRON declares that its products are in compliance by meeting the requirements defined under Directive 2011/65/EU (RoHS 2) and delegated Directive 2015/863/EU of the European Parliament. Please be aware that relevant exemptions listed in Annex III or IV of EU RoHS and specific conditions for customer specific products might apply.

This statement has been issued on the basis of currently applicable suppliers information and to our best knowledge and expertise currently available.

Best regards,

Karl-Heinz Gaubatz  
CEO/CTO

Peter Sontheimer
