

Biandrate, 2019, February 13<sup>th</sup>

Dear Customer,

The Regulation EC 1906/2006, REACH, about registration, evaluation, authorization and restriction of chemicals, provides some prescription to people involved in chemicals supply chain.

As far as we are concerned, and following REACH definitions, we are users of substances, mixtures and articles and producers of articles not intended release of hazardous substances.

Based on informations we received by our suppliers, and based on the knowledge of our manufacturing process and our finished products, we can say that we are not concerned by art. 33, so we don't have to provide a Safety Data Sheet.

Anyway, we are available to provide a general Safe Use Information Sheet for Articles.

Cordiali saluti

Saint-Gobain Performance Plastics h-old SPA
