LIYCY 2x0,75 mm<sup>2</sup>

# Elektroskandia Norge AS

www.epd-norge.no

Valid to:

## **General information**

#### **Product:**

LIYCY 2x0,75 mm<sup>2</sup>

#### Program operator:

The Norwegian EPD Foundation Pb. 5250 Majorstuen, 0303 Oslo Phone: +47 23 08 80 00 e-mail: post@epd-norge.no

### **Declaration number:**

NEPD-3537-2131-EN

### **ECO Platform reference number:**

### This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A1:2013 serves as core PCR NPCR 027 Part B for Electrical cables and wires

#### Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

#### **Declared unit:**

1 m LIYCY 2x0,75 mm<sup>2</sup>

### Declared unit with option:

A1,A2,A3,A4,A5,C1,C2,C3,C4,D

### **Functional unit:**

### General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Individual third party verification of each EPD is not required when the EPD tool is i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPDNorway, and iii) the process is reviewed annualy. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools.

### **Verification of EPD tool:**

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Fredrik Moltu Johnsen, Norsus AS

(no signature required)

### Owner of the declaration:

Elektroskandia Norge AS Contact person: Pål Kristiansen Phone: +47 97 66 22 12 e-mail: pkr@elektroskandia.no

#### Manufacturer:

Elis Elektro AS Jerikoveien 16 1067 Oslo Norway

### Place of production:

Kabeltec GMBH Werkstr. 43 78727 Oberndorf Germany

#### Management system:

ISO 14001, ISO 9001

#### Organisation no:

977 454 700

Issue date: 23.05.2022

Valid to: 23.05.2027

### Year of study:

2020

### Comparability:

EPD of construction products may not be comparable if they not comply with EN 15804 and seen in a building context.

### **Development and verification of EPD:**

The declaration has been developed and verified using EPD tool lca.tools ver EPD2020.11, developed by LCA.no AS. The EPD tool is integrated into the company's environmental management system, and has been approved by EPD-Norway

Developer of EPD:

Nanna Wister - Elis Elektro AS

Reviewer of company-specific input data and EPD:

Stig Linneberg - Elis Elektro AS

### Approved:

Sign

Håkon Hauan, CEO EPD-Norge

# **Product**

### **Product description:**

LIYCY to be used as junction or connecting cables in control, measuring, and signalling technology as well as in data processing and office technology for lossless transmission of data and signals. The tight copper screening provides optimum protection against external electrical interference. Suitable for use in dry and humid rooms. For fixed laying and flexible applications with undefined cable routing and without tensile stress. Good chemical resistance, largely oil resistant.

#### **Product specification**

General: Factory Standard

Materials	kg	%
E-PVC	0,02	28,30
Copper	0,04	71,70
Total:	0,05	

### Technical data:

Construction standards: Factory Standard.

Fine strands of bare copper conductor, stranding acc. to VDE 0295 class 5. PVC core insulation, colored cores acc. to DIN 47100 for cross sections from 0,14 to 0,75 mm<sup>2</sup>.

Black cores with continuous figure imprint in white from cross sections 1,0 to 10,0 mm<sup>2</sup>.

Overall screen of tinned cooper wires, cores twisted into layers, foil wrapping. PVC outer sheath grey, RAL 7001 or RAL 7032

Conductor Material: Copper, bare

Conductor class: Class 5 acc. to DIN VDE 0295 or IEC 60228

Core insulation: Thermoplastic PVC

Core identification: Cross sections from 0,14 to 0,75 mm<sup>2</sup> coloured cores acc. to DIN 47100 From 1,0 to 10 mm<sup>2</sup>. Black cores with continuous figure imprint in white

Construction: Stranding cores revolved into layers

Outer sheath: PVC

Sheath colour: Grey (RAL 7001 or RAL 7035)

Rated voltage[V]: 300/500 Testing voltage[V]: 1200/1500

Conductor resistance: according to DIN VDE 0295, IEC 60228

Insulation resistance: 20 Megaohms x km

Min. bending radius fixed [xd]: 12 mm 5 x d until 20 mm 7,5 x d > 20 mm:10 Min. bending radius moved [xd]: 12 mm 10 x d until 20 mm 15 x d > 20

Working temp fixed min/max [C]: -30  $^{\circ}$ C up to +80  $^{\circ}$ C Working temp moved min/mac [C]: -15  $^{\circ}$ C up to +70  $^{\circ}$ C

Burning behaviour IEC 60332-1: self-extinguishing and flame-retardant

Approvals: based on VDE 0812

Temp at conductor max. +70 °C in operation, +160 °C in case of short-circuit CPR: EN 50575 compliance ECA, No.DOP/229/BW/17/K

Reference service life, construcion

## LCA: Calculation rules

### **Declared unit:**

1 m LIYCY 2x0,75 mm<sup>2</sup>

### Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

### Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

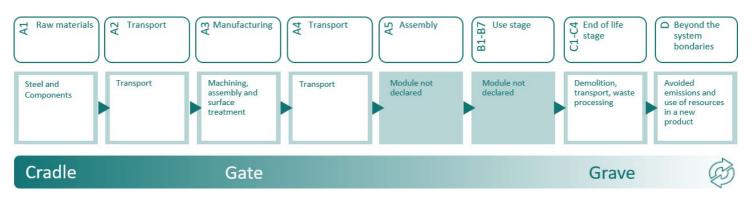

### Data quality:

Specific data for the product composition are provided by the manufacturer. They represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on registered EPDs according to EN 15804, Ostfold Research databases, ecoinvent and other LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Copper	ecoinvent 3.6	Database	2019
E-PVC	ecoinvent 3.6	Database	2019

# System boundary:

## Additional technical information:

From a production volume perspective, article LIYCY Liycy 2x0,75 mm<sup>2</sup> (1001643) represents the maximum energy consumption from the most common product articles.

Range includes LIYCY cables from 0,14 mm<sup>2</sup> to 1,5 mm<sup>2</sup> For more information and dimensions, see our webpage: https://eliselektro.no/produkt/liycy/

# LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

In A4, a transport distance of 3992 km from the production site to Elektroskandia's warehouse in Langhus was included. A distance of 300 km was also added as additional transport to market. Installation in trenches (A5) and removal (C1) is assumed to be done with other products such as piping systems and should be assessed at a construction works level. In C3 metals such as copper and aluminium are sent to recycling and other materials such as plastic insulation is sent to municipal incineration. Net benefit of material recycling and energy recovery is given in module D. Both aluminium and copper will replace a market average process for the metals in Europe.

### Transport from production place to user (A4)

Туре	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Unit	Value (I/t)
Truck	38,8 %	Truck, lorry 16-32 tonnes, EURO 5	4292	0,044606	l/tkm	191,45
Railway					l/tkm	
Boat					l/tkm	
Other Transportation					l/tkm	

### End of Life (C1, C3, C4)

	Unit	Value
Hazardous waste disposed	kg	
Collected as mixed construction waste	kg	
Reuse	kg	
Recycling	kg	0,0342
Energy recovery	kg	0,0150
To landfill	kg	0,0062

### Transport to waste processing (C2)

Туре	Capacity utilisation (incl. return) %	Type of vehicle	Distance km	Fuel/Energy consumption	Unit	Value (I/t)
Truck	38,8 %	Truck, lorry 16-32 tonnes, EURO 6	85	0,043626	l/tkm	3,71
Railway					l/tkm	
Boat					l/tkm	
Other Transportation					l/tkm	

### ••

### Benefits and loads beyond the system boundaries (D)

	Unit	Value
Substitution of primary Copper with net secondary copper (kg)	kg	0,03
Substitution of electricity, in Norway (MJ)	MJ	0,02
Substitution of thermal energy, district heating, in Norway (MJ)	MJ	0,17

# **LCA: Results**

LCA results according to the indicators of EN 15804:2013+A1:2013 are presented in the following tables, for the declared unit defined on page 2 of the EPD document. All potential environmental impacts might not be covered by the EN 15804 indicators. This concerns indicators such as noise, electromagnetic radiation, electromagnetic fields and treatment brominated flame retardants.

# **Additional Norwegian requirements**

### Greenhouse gas emissions from the use of electricity in the manufacturing phase

National production mix from import, low voltage (production of transmission lines, in addition to direct emissions and losses in grid) of applied electricity for the manufacturing process (A3).

#### **Dangerous substances**

The product contains no substances given by the REACH Candidate list or the Norwegian priority list.

### **Indoor environment**
