

Safety Data Sheet

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name **MAGIC POWER GEL part A**
MAGIC POWER GEL part A, MAGIC POWER GEL, MAGIC POWER JOINT, POWER KIT, GALACTIC WATER STOP

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use **Insulation of electrical or electronic equipment**

1.3. Details of the supplier of the Information Sheet

Name **RAYTECH S.R.L.**
Full address **Raytech Srl**
District and Country **20019 Settimo Milanese (MILANO)**
ITALIA
Tel. **+39 (02) 33500147**
Fax **+39 (02) 33500287**
e-mail address of the competent person responsible for the information sheet **info@raytech.it**

1.4. Emergency telephone number

For urgent inquiries refer to **NHS Direct (UK): +44 0845 46 47**

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is not classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements).

Hazard classification and indication: --

2.2. Label elements

Hazard pictograms: --

Signal words: --

Hazard statements: --

Precautionary statements: --

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration \geq 0.1%.

SECTION 3. Composition/information on ingredients

3.2. Mixtures

Blend of organosiloxanes, additives. No dangerous components.

SECTION 4. First aid measures

4.1. Description of first aid measures

Not specifically necessary. In any case, compliance with the rules of good industrial hygiene is recommended.

Rescuer protection

Information not available

4.2. Most important symptoms and effects, both acute and delayed

There are no known incidents of health damage attributable to the product.

4.3. Indication of any immediate medical attention and special treatment needed

No specific recommendations. Show this safety data sheet to your doctor.

Means to have available in the workplace for specific and immediate treatment

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use breathing equipment if fumes or powders are released into the air. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material information sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use.

7.2. Conditions for safe storage, including any incompatibilities

Keep the product in clearly labelled containers. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s)

No specific recommendations. Consult the product technical data sheet for further information.

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

An exposure limit has not been defined for any component.

8.2. Exposure controls

Avoid inhalation of vapours/aerosols/dusts and contact with skin and eyes. Personal protective equipment must be chosen according to applicable standards, must be suitable for the conditions of use of the product and must be chosen in agreement with the supplier of the personal protective equipment.

Suitable Technical Controls:

Use control equipment to reduce air contamination to the allowable exposure level. The level of protection and types of controls needed vary depending on the conditions of potential exposure. Technical checks are always preferable to personal protective equipment.

Control measures to consider: Ensure adequate ventilation.

In case of insufficient ventilation:

Use airtight safety containers, local exhaust ventilation, or other engineering controls to keep air levels below recommended exposure limits. If exposure limits have not been established, keep levels of dust released into the air at an acceptable level. Install an eyewash station and a safety shower.

HAND PROTECTION

This recommendation is valid exclusively for the product named in the safety data sheet provided by us and for the purpose indicated by us. If this product is mixed with other substances, it will be necessary to contact a supplier of CE approved protective gloves to determine which gloves are appropriate.

Prolonged and repeated contact:

Material: Nitrile.

Glove thickness: 1.25 mm Guidelines: EN374-3

Brief contact:

Material: Nitrile / Neoprene Glove Thickness: 0.198 mm Guidelines: EN374-3

SKIN PROTECTION

Wear suitable protective clothing to prevent any possibility of skin contact. Isolate contaminated clothing and wash before reuse. In case of splashes: Wear an apron or special protective clothing.

FACE AND EYE PROTECTION

Safety glasses with side shields.

RESPIRATORY PROTECTION

If plant controls do not allow air concentrations to be maintained below the recommended exposure limit values (where applicable) or at an acceptable level (in countries where exposure limit values have not been established), a compliant respirator must be used. .

Use the following CE approved air-purifying respirator: ABEK type combination filter respirator. Wear respiratory protection with a combined filter

(dust and gas filter) during operations that lead to the formation of dust/aerosols.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties	Value	Information
------------	-------	-------------

SECTION 9. Physical and chemical properties ... / >>

Appearance	viscous liquid	
Colour	colourless	
Odour	odourless	
Melting point / freezing point	not available	
Initial boiling point	not available

Density and/or relative density	1 kg/dm ³	Temperature: 20 °C
Relative vapour density	not available	
Particle characteristics	not applicable	

9.2. Other information

9.2.1. Information with regard to physical hazard classes

Information not available

9.2.2. Other safety characteristics

Information not available

SECTION 10. Stability and reactivity

10.1. Reactivity

There are no particular risks of reaction with other substances in normal conditions of use.

10.2. Chemical stability

The product is stable in normal conditions of use and storage.

10.3. Possibility of hazardous reactions

No hazardous reactions are foreseeable in normal conditions of use and storage.

10.4. Conditions to avoid

None in particular. However the usual precautions used for chemical products should be respected.

10.5. Incompatible materials

Strong oxidizing agents.

10.6. Hazardous decomposition products

Thermal decomposition or burning may liberate carbon oxides and other toxic gases and vapors. Amorphous silica.

SECTION 11. Toxicological information

According to currently available data, this product has not yet produced health damages. Anyway, it must be handled according to good industrial practices.

11.1. Information on hazard classes as defined in Regulation (EC) No 1272/2008

SECTION 11. Toxicological information ... / >>Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

ATE (Oral) of the mixture:	Not classified (no significant component)
ATE (Dermal) of the mixture:	Not classified (no significant component)

SKIN CORROSION / IRRITATION

Does not meet the classification criteria for this hazard class

SERIOUS EYE DAMAGE / IRRITATION

Does not meet the classification criteria for this hazard class

RESPIRATORY OR SKIN SENSITISATION

Does not meet the classification criteria for this hazard class

GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

STOT - SINGLE EXPOSURE

Does not meet the classification criteria for this hazard class

STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

11.2. Information on other hazards

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with human health effects under evaluation.

SECTION 12. Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

SECTION 12. Ecological information ... / >>

Information not available

12.2. Persistence and degradability

Information not available

12.3. Bioaccumulative potential

Information not available

12.4. Mobility in soil

Information not available

12.5. Results of PBT and vPvB assessment

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances listed in the main European lists of potential or suspected endocrine disruptors with environmental effects under evaluation.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations**13.1. Waste treatment methods**

Reuse, when possible. Neat product residues should be considered special non-hazardous waste.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

The user's attention is drawn to the possible existence of local legislation relating to disposal.

Disposal Methods: Dispose of waste in an appropriate treatment and disposal center in accordance with applicable laws and regulations and the characteristics of the product at the time of disposal. Incinerate.

Contaminated Containers: Contaminated packaging should be emptied as much as possible. Dispose of waste in an appropriate treatment and disposal center in accordance with applicable laws and regulations and the characteristics of the product at the time of disposal. After cleaning, recycle or dispose of at an authorized center.

SECTION 14. Transport information

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

14.1. UN number or ID number

not applicable

14.2. UN proper shipping name

not applicable

14.3. Transport hazard class(es)

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

SECTION 16. Other information ... / >>

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.

Limitation of Liability:

The information provided is based on the data available for the material in question, the components of the material and similar materials.

This information is believed to be correct. The information is given in good faith.

This information is to be used to make an independent determination of methods for protecting workers and the environment.

Changes to previous review:

The following sections were modified:

04 / 07 / 09 / 13.

Safety Data Sheet

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name **MAGIC POWER GEL part B**
MAGIC POWER GEL part B, MAGIC POWER GEL, MAGIC POWER JOINT, POWER KIT, GALACTIC WATER STOP

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use **Insulation of electrical or electronic equipment**

1.3. Details of the supplier of the Information Sheet

Name **RAYTECH S.R.L.**
Full address **Raytech Srl**
District and Country **20019 Settimo Milanese (MILANO)**
ITALIA
Tel. **+39 (02) 33500147**
Fax **+39 (02) 33500287**
e-mail address of the competent person responsible for the information sheet **info@raytech.it**

1.4. Emergency telephone number

For urgent inquiries refer to **NHS Direct (UK): +44 0845 46 47**

SECTION 2. Hazards identification

2.1. Classification of the substance or mixture

The product is not classified as hazardous pursuant to the provisions set forth in EC Regulation 1272/2008 (CLP) (and subsequent amendments and supplements).

Hazard classification and indication: --

2.2. Label elements

Hazard pictograms: --

Signal words: --

Hazard statements: --

Precautionary statements: --

2.3. Other hazards

On the basis of available data, the product does not contain any PBT or vPvB in percentage \geq than 0,1%.

The product does not contain substances with endocrine disrupting properties in concentration \geq 0.1%.

SECTION 3. Composition/information on ingredients

3.2. Mixtures

Blend of organosiloxanes, additives. No dangerous components.

SECTION 4. First aid measures

4.1. Description of first aid measures

Not specifically necessary. In any case, compliance with the rules of good industrial hygiene is recommended.

Rescuer protection

Information not available

4.2. Most important symptoms and effects, both acute and delayed

There are no known incidents of health damage attributable to the product.

4.3. Indication of any immediate medical attention and special treatment needed

No specific recommendations. Show this safety data sheet to your doctor.

Means to have available in the workplace for specific and immediate treatment

Information not available

SECTION 5. Firefighting measures

5.1. Extinguishing media

SUITABLE EXTINGUISHING EQUIPMENT

The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.

UNSUITABLE EXTINGUISHING EQUIPMENT

None in particular.

5.2. Special hazards arising from the substance or mixture

HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE

Do not breathe combustion products.

5.3. Advice for firefighters

GENERAL INFORMATION

Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.

SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS

Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

SECTION 6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Use breathing equipment if fumes or powders are released into the air. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Confine using earth or inert material. Collect as much material as possible and eliminate the rest using jets of water. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

SECTION 7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material information sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use.

7.2. Conditions for safe storage, including any incompatibilities

Keep the product in clearly labelled containers. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s)

No specific recommendations. Consult the product technical data sheet for further information.

SECTION 8. Exposure controls/personal protection

8.1. Control parameters

An exposure limit has not been defined for any component.

8.2. Exposure controls

Avoid inhalation of vapours/aerosols/dusts and contact with skin and eyes. Personal protective equipment must be chosen according to applicable standards, must be suitable for the conditions of use of the product and must be chosen in agreement with the supplier of the personal protective equipment.

Suitable Technical Controls:

Use control equipment to reduce air contamination to the allowable exposure level. The level of protection and types of controls needed vary depending on the conditions of potential exposure. Technical checks are always preferable to personal protective equipment.

Control measures to consider: Ensure adequate ventilation.

In case of insufficient ventilation:

Use airtight safety containers, local exhaust ventilation, or other engineering controls to keep air levels below recommended exposure limits. If exposure limits have not been established, keep levels of dust released into the air at an acceptable level. Install an eyewash station and a safety shower.

HAND PROTECTION

This recommendation is valid exclusively for the product named in the safety data sheet provided by us and for the purpose indicated by us. If this product is mixed with other substances, it will be necessary to contact a supplier of CE approved protective gloves to determine which gloves are appropriate.

Prolonged and repeated contact:

Material: Nitrile.

Glove thickness: 1.25 mm Guidelines: EN374-3

Brief contact:

Material: Nitrile / Neoprene Glove Thickness: 0.198 mm Guidelines: EN374-3

SKIN PROTECTION

Wear suitable protective clothing to prevent any possibility of skin contact. Isolate contaminated clothing and wash before reuse. In case of splashes: Wear an apron or special protective clothing.

FACE AND EYE PROTECTION

Safety glasses with side shields.

RESPIRATORY PROTECTION

If plant controls do not allow air concentrations to be maintained below the recommended exposure limit values (where applicable) or at an acceptable level (in countries where exposure limit values have not been established), a compliant respirator must be used. .

Use the following CE approved air-purifying respirator: ABEK type combination filter respirator. Wear respiratory protection with a combined filter

(dust and gas filter) during operations that lead to the formation of dust/aerosols.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

12.7. Other adverse effects

Information not available

SECTION 13. Disposal considerations**13.1. Waste treatment methods**

Reuse, when possible. Neat product residues should be considered special non-hazardous waste.

Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.

The management of waste arising from the use or dispersal of this product must be organised in accordance with occupational safety regulations. See section 8 for possible need for PPE.

CONTAMINATED PACKAGING

Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.

The user's attention is drawn to the possible existence of local legislation relating to disposal.

Disposal Methods: Dispose of waste in an appropriate treatment and disposal center in accordance with applicable laws and regulations and the characteristics of the product at the time of disposal. Incinerate.

Contaminated Containers: Contaminated packaging should be emptied as much as possible. Dispose of waste in an appropriate treatment and disposal center in accordance with applicable laws and regulations and the characteristics of the product at the time of disposal. After cleaning, recycle or dispose of at an authorized center.

SECTION 14. Transport information

The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

14.1. UN number or ID number

not applicable

14.2. UN proper shipping name

not applicable

14.3. Transport hazard class(es)

not applicable

14.4. Packing group

not applicable

SECTION 14. Transport information ... / >>**14.5. Environmental hazards**

not applicable

14.6. Special precautions for user

not applicable

14.7. Maritime transport in bulk according to IMO instruments

Information not relevant

SECTION 15. Regulatory information**15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture**Seveso Category - Directive 2012/18/EU: NoneRestrictions relating to the product or contained substances pursuant to Annex XVII to EC Regulation 1907/2006

<u>Product</u>	
Point	40
<u>Contained substance</u>	
Point	75

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors
not applicableSubstances in Candidate List (Art. 59 REACH)On the basis of available data, the product does not contain any SVHC in percentage \geq than 0,1%.Substances subject to authorisation (Annex XIV REACH)

None

Substances subject to exportation reporting pursuant to Regulation (EU) 649/2012:

None

Substances subject to the Rotterdam Convention:

None

Substances subject to the Stockholm Convention:

None

Healthcare controls

Information not available

15.2. Chemical safety assessment

A chemical safety assessment has not been performed for the preparation/for the substances indicated in section 3.

As this product is not classified as dangerous, a Chemical Safety Assessment is not required. For information on safe use, see section 8 of this safety data sheet.

SECTION 16. Other information**LEGEND:**

- ADR: European Agreement concerning the carriage of Dangerous goods by Road
- ATE: Acute Toxicity Estimate
- CAS: Chemical Abstract Service Number
- CE50: Effective concentration (required to induce a 50% effect)
- CE: Identifier in ESIS (European archive of existing substances)
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived No Effect Level
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of classification and labeling of chemicals
- IATA DGR: International Air Transport Association Dangerous Goods Regulation
- IC50: Immobilization Concentration 50%
- IMDG: International Maritime Code for dangerous goods
- IMO: International Maritime Organization

SECTION 16. Other information ... / >>

- INDEX: Identifier in Annex VI of CLP
- LC50: Lethal Concentration 50%
- LD50: Lethal dose 50%
- OEL: Occupational Exposure Level
- PBT: Persistent, bioaccumulative and toxic
- PEC: Predicted environmental Concentration
- PEL: Predicted exposure level
- PMT: Persistent, mobile and toxic
- PNEC: Predicted no effect concentration
- REACH: Regulation (EC) 1907/2006
- RID: Regulation concerning the international transport of dangerous goods by train
- TLV: Threshold Limit Value
- TLV CEILING: Concentration that should not be exceeded during any time of occupational exposure.
- TWA: Time-weighted average exposure limit
- TWA STEL: Short-term exposure limit
- VOC: Volatile organic Compounds
- vPvB: Very persistent and very bioaccumulative
- vPvM: Very persistent and very mobile
- WGK: Water hazard classes (German).

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Chemical and physical hazards: Product classification derives from criteria established by the CLP Regulation, Annex I, Part 2. The data for evaluation of chemical-physical properties are reported in section 9.

SECTION 16. Other information ... / >>

Health hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 3, unless determined otherwise in Section 11.

Environmental hazards: Product classification is based on calculation methods as per Annex I of CLP, Part 4, unless determined otherwise in Section 12.

Limitation of Liability:

The information provided is based on the data available for the material in question, the components of the material and similar materials.

This information is believed to be correct. The information is given in good faith.

This information is to be used to make an independent determination of methods for protecting workers and the environment.
